MD. SOJIBUL ISLAM RANA

SOFTWARE ENGINEER | FULL-STACK DEVELOPMENT

Mymensingh, Bangladesh | +880 1960-629911 | sojibulislamrana.dev@gmail.com

github.com/sojibulislamrana | linkedin/sojibulislamrana | Portfolio

PROFESSIONAL SUMMARY

CSE undergraduate and software developer focused on building practical web applications, developer tools, and evidence-grounded AI systems. Experienced with React, Next.js, TypeScript, Node.js, and MongoDB, with additional work in Python-based RAG systems, native macOS development, and C/C++. Experienced in Linux-based workflows, and open-source collaboration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, Dart, Swift | **Web:** React, Next.js, Node.js, Express.js, TipTap, Clerk, Drizzle, Liveblocks

Data & APIs: MongoDB, REST APIs, Convex, SQLite, FastAPI | **Tools & Systems:** Git, Linux, Docker, Neovim, Emacs, terminal workflows

OPEN-SOURCE CONTRIBUTION

Kubernetes Documentation — Bengali Localization | *May 2024 – Sep 2024*

Contributed to Bengali localization of Kubernetes documentation, helping make official technical documentation more accessible to Bengali-speaking developers and learners. Kubernetes Bengali documentation

SELECTED PROJECTS

Live Doc — Real-Time Collaborative Document Editor GitHub

Built a Google Docs-style editor with real-time collaboration, shared cursors, comments and mentions, document templates, file import/export, and organization-aware workspaces. *Tech: Next.js, React, TypeScript, Convex, Clerk, Liveblocks, TipTap, Tailwind CSS*

UniShop — University e-commerce platform GitHub

Developed a university focused e-commerce platform with a curated catalog, persistent cart, promo code, online checkout and admin dashboard for revenue analytics and order tracking. *Tech: Next.js, React, Express, MongoDB, Stripe*

One Thing — macOS Menu Bar App GitHub

Created a lightweight native macOS utility that keeps one priority or short note visible in the menu bar, with launch-at-login support and a script-based build workflow. *Tech: Swift, AppKit, SwiftUI, Makefile*

Awesome CLI Task Manager GitHub

Built a terminal-based task manager supporting task creation, editing, completion, priorities, tags, due dates, search, statistics, export, and lightweight local storage. *Tech: Node.js, JavaScript, JSON*

EXPERIENCE

Full Stack Web Developer | Soft Engine Lab | *Jan 2025 – Dec 2025*

- Built and maintained responsive web application features using React, Node.js, and MongoDB
- Contributed to API design, database operations, application deployment, and basic DevOps tasks.

Programmer Intern | DhumketuX | *May 2024 – Sep 2024*

- Contributed to research-oriented software development during work with an early-stage rocketry team.
- Applied image-processing and machine-learning techniques to obstacle-detection experiments.

Technical Educator & Content Creator | MEC Open Course Ware / Alpha Science Lab | *Apr 2021 – Present*

- Create and deliver learning content on C programming, competitive programming, problem solving, and machine learning/AI.
- Explain programming fundamentals and algorithmic thinking through structured educational material.

EDUCATION

B.Sc. in Computer Science and Engineering

Mymensingh Engineering College, affiliated with the University of Dhaka

Mymensingh, Bangladesh | Expected Dec 2026

COURSES & CERTIFICATIONS

- CS50: Introduction to Computer Science — Harvard University
- Machine Learning Specialization — Andrew Ng / DeepLearning.AI
- Complete Web Development Course, Batch 12 — Programming Hero
